EXPERIENCE

2018 Ene

Web Programmer
Intern in the Mexican Government SECOGEY

Developing the project "Comprehensive System of the General Comptroller's Office". Carrying out the following activities: Web development, Requirements statement, database design and Documentation. Focused on PHP and JS

2018 Jun

Full Stack Web Developer
Company: Gant Business Solutions

In this agency I developed as a full stack web programmer, leading projects doing: requirements, design, development, testing and maintenance of numerous web pages and services. Using different tools, technologies and frameworks. This has allowed me to broaden my vision of the web design and development industry.

2020 feb

Web Freelancer

Thanks to the knowledge acquired in the previous company and due to contingency issues, I have been able to develop projects for different people and brands that have needed help with their customized web projects.

2020 jun

Full Stack Web, Focused on CMS
Company: Vex Solutions

In this international company I have been working, developing different modules. Plugins and tools focused on CMS Php such as Prestashop, Wordpress, Woocommerce, Moodle, Magento. I made various plugins from facial recognition, cryptocurrencies, payment gateways, payments with QR services, using Amazon services, creating bots, etc.

2020 nov

Web Master, Project manager
Company: Red n Black Team

In this computer security and programming company they hired me as a leader of different kinds of projects in the area of web development, I worked hand in hand with technologies such as laravel, laravel mix, typescript, webpack, vue 3, AWS, Management of different apis and many other technologies. The company developed different web applications focused on products and services.
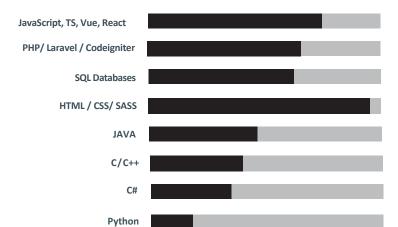

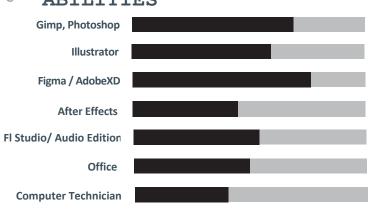

2021 sept

Mid Senior FE Developer
Company: Softtek and Sonatafy companies

In Softtek and Sonatafy I have dedicated myself completely as a FE developer working mainly with React and Next JS migrating and maintaining the aspire rewards platform as well as maintaining the legacy platform with polymer. This jobs have allowed me to work 100% remotely with American companies and has allowed me to obtain very good practices and experience as a developer.
